5. Role of Mother in Child Development

Dr. Ayodhya D. Pawal (Kakde)

Assistant Professor, Department of Home Science, Arts & Science College, Gadhi.

Introduction

Women play significant roles in our society from their birth till the end of life. Even after playing her all the roles and all jobs timely in efficient manner in the modern society. Mother role is very important in child development. Mother is given all sanskars from pregnancy period to her children in all aspects. Children good health is very important for their all round developments. Child development refers to the sequence of physical, language, thought and emotional changes that occur in a child from birth to the beginning of adulthood. During this process a child progresses from dependency on their parents to increase independence.

The simplest of activities at every age level promotes stimulation and growth in their cognitive, social, language and physical skills. These four domains develop all at the same time. Cognitive development is learning and processing of information of thinking and knowing.

Objectives

1. To study Mother and children relationship.
2. To study roles of Mother.
3. To study responsibilities of Mother.

Methodology

Data were collected from 100 Mothers of children. Data were collected by using survey method. Samples were collected from village Gadhi. Tq. Georai Dist. Beed.

Result & Discussion

When Child arrives change the parent life. A mother has to look after each need of her child and take care of everything related to her. A Mother role is raising a child to inculcating moral values into them for children development. A mother is playing a crucial role in children development. A Mother makes a tremendous contribution in her child's life. A child's life revolves around his or her Mother.

A mother is a protector, guide and friend. A mother is a selfless, loving human who must sacrifice many of their wants and needs for their children. A mother can greatly influence child's

growth and development. She has an extremely important role to play when it comes to boosting child's development. Although all mothers are aware of their duties, it can become easier for mothers if they understand their roles and responsibilities thoroughly. Becoming a mother changes entire life and lifestyle as well. Right from the time you become pregnant you have to undergo different types of challenges and surprises. Knowingly or unknowingly you constantly do a lot of things for your child.

Important Roles and Responsibilities of Mothers

Family Attachment

A mother helps her child learn about the importance of family as she is the back bone of the family and holds everyone together. Have family meals together and encourage your child to spend time with family members. Children learn relationship and attachment of the family members.

Strongest Emotional Attachment with the Child

A mother & her child is the first strongest emotional attachment in their life. Mother is first care taker to her children. During the period of early months and years of children age mother and children interact with each other. So this period of impact is more in children life.

Children first expressed her or his emotions to their mother. It will get reflected in the social and emotional setting of child in later years.

Be Kind, Loving & Caring

A Mother care taking and loving in daily activities of the children. A Mother behavior is the most impact on her children. Children also loving a lot with his or mother so the most attachment seen in between mother and children.

Positive Attitude

Since a mother is soft and handles things in a positive way, it teaches the child that no matter whether life is tough, it can be handled in a better way. You can discuss the problems with your children and explain how you are going to tackle it.

Importance of Discipline

A mother giving proper guidelines of the daily routine disciplines. Children were observes mostly his or her mother and then follows disciplines of the family. A mother teaches all types of disciplines to the children which is most important in their life.

Giving proper Environment

A mother is responsible for to provide proper environment to the children for their all round development of the children. A mother provides proper environment for right development of the children in beginning period. Mothers are responsible for the environment that a child gets from the very beginning giving space for movement, creativity and play offers right environment for child development.

Hard Work

A child learns to work hard from her mother. On the other hand your child might see that at the end of the day you get tired but if you explain the pleasure and satisfaction that you get from working hard, the right message will be delivered.

Mother is given nutritious food to the children for their healthy life. Only mother is taking care for disabled children. A mother is providing all the facilities which necessary in early stage of life.

Conclusion

A mother role & responsibilities are most important in their children development. A mother had taken proper care of children for physical, Psychological, social, emotional and economical development of the children.
